

Day One

CLD ADVENT CALENDAR

THE POWER OF VISION BOARDS

Happy first of December!

To kick off the last chapter of the year with the best intentions for 2024, we want you to create a vision board over the weekend.

But what's a vision board you might ask - well we are sure you have seen them already. It's those creative collages with all the dreams and goals for the coming year. It's a bunch of images and quotes that scream, "This is my vibe for the next 365 days! This is the life I will create for myself. This will be my reality!"

To create your vision board you just have to do the following:

1. Go to [Pinterest.com](https://www.pinterest.com) and type in some keywords into the search bar that best describe what you are longing for in 2024. Could be "European Summer", "happy family", "apartment in the city" or even some motivational quotes. Download them onto your phone or laptop.
2. Next, you can decide if you want to print them out and create a physical vision board, or if you want to keep it digital. For that you have the option to create it on Instagram Stories by just adding them all onto one slide and then saving it to your photo album. Or you can use [Canva](https://www.canva.com) and use the templates that we have created for you (linked below!).
3. All that's left is for you to download your vision board and set it as a wallpaper or anywhere else where you can also see and manifest it! If you decide to post it onto Instagram, make sure to tag [@clublifedesign](https://www.instagram.com/clublifedesign) so that we can see your 2024 visions!

Here's to a December full of dreaming big and a New Year where our vision board goals become the real deal. We can't wait to dive into this creative adventure together with you. Let's do it!
